

AbsorbPRO™

HIGH-PERFORMANCE SOLIDIFICATION

High-Performance Solidification for Liquid Waste

**Liquid waste solidification.
For sludge, slurry, and liquid waste.**

AbsorbPRO™ is a high-performance drying and solidification agent designed to help environmental, industrial, and remediation teams manage liquid and semi-liquid waste more efficiently.

From sludge and slurry to contaminated liquid waste, AbsorbPRO™ helps stabilize wet materials so they can be more easily handled, transported, and disposed of. With absorption capacity of up to three times its own weight, AbsorbPRO™ provides practical support for demanding cleanup, dredging, and waste management applications.

Applications — AbsorbPRO™ is well suited for:

- Remediation site liquid waste solidification
- Contaminated pond dredging
- Industrial liquid waste management
- Sludge and slurry solidification

Key Benefits

- Transforms liquid waste into manageable solids
- Reduces waste volume and disposal costs
- Simplifies handling and transport of waste materials
- Supports efficient disposal preparation
- Absorbs up to three times its own weight
- Can be customized with polymers or additives

AbsorbPRO™

HIGH-PERFORMANCE SOLIDIFICATION

Features & Benefits

Efficient Solidification AbsorbPRO™ helps turn difficult liquid and semi-liquid waste streams into a more manageable form for removal, hauling, and disposal.

Reduces Volume and Disposal Costs

By converting liquid waste to solid form, AbsorbPRO™ can help reduce the volume of material requiring disposal, lowering disposal costs, transport costs, and the number of hauls required.

Purpose-Built for Remediation

Applications AbsorbPRO™ supports demanding remediation, dredging, and industrial waste management applications where liquid waste must be stabilized for handling, transport, and disposal.

Customizable Formulation AbsorbPRO™ can be customized with polymers or additives to better align with specific waste characteristics, site conditions, or project requirements.

Part of LSC's Remediation Product Suite

AbsorbPRO™ complements LSC's broader remediation portfolio, including Posi-Lock® Containment System, EarthGuard® Liquid dust and erosion control, and Odor-Armor® odor elimination technology.
