Does not contain seed

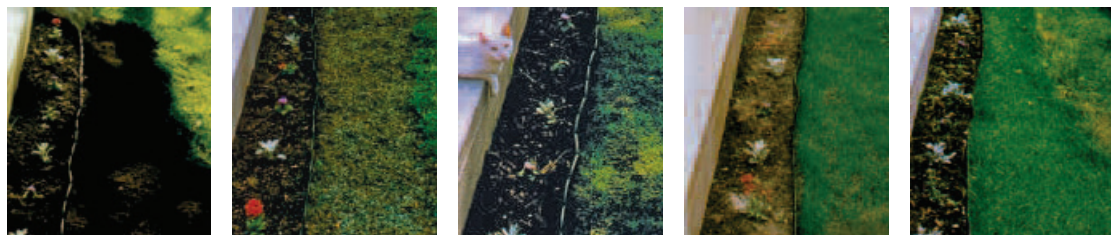

EZ Mulch is a user-friendly alternative to straw for seed establishment.

Replace messy straw with EZ Mulch. EZ Mulch is a user-friendly alternative to straw. It contains no weed seeds and contains much less dust than straw. Typically, 50 to 70 pounds covers 1000 square feet.

EZ Mulch's granular texture provides excellent coverage, making it more economical than other pelleted mulches. This improved coverage reduces soil and water runoff. The granules expand as they absorb water.

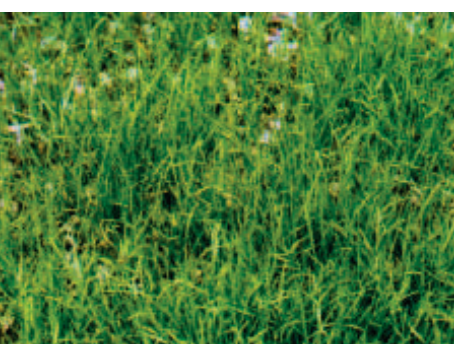

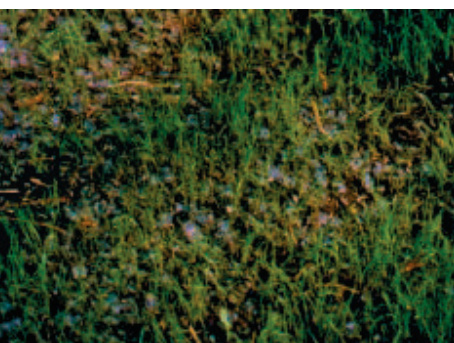

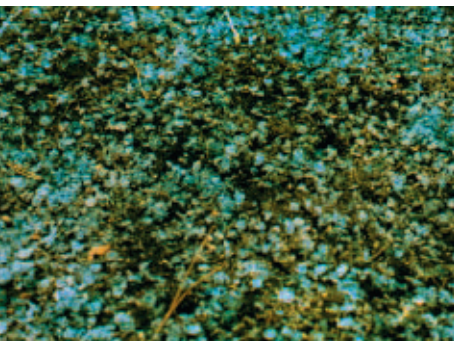

EZ Mulch contains no grass seed, allowing the user to choose the seed that is best suited to their location. EZ Mulch's dark green color makes it easy to monitor its application, improves seed germination and enhances the site appearance.

After germination, the mulch biodegrades, adding beneficial organic matter to the soil. EZ Mulch can be easily applied by hand, with a drop spreader, and hydraulically. EZ Mulch will mix in a hydroseeder more quickly than most baled mulches.

PAPER & CORN FIBER PELLETS

Application Rates & Technical Data

Typical Application Rate: 50-70# per 1,000 ft²

Contact your LSC representative for site specific application rate and instructions.

Directions:

1. Prepare soil and spread grass seed according to directions on package. EZ Mulch contains no grass seed.
2. Spread EZ Mulch over seeded area at a rate of 50-70# per 1000 ft²
3. Water EZ Mulch pellets which will expand to cover and protect the seeded ground.
4. Water seeded area daily. Seeds will germinate and EZ Mulch will biodegrade and add organic content to your soil.

Also available with Tackifier:

- Can be used on moderate slopes, up to 3:1
- Specific adhesive strength comparable to virgin wood fiber with 3% Guar Gum Tackifier

Technical Data	
Organic Content	>99%
Moisture Content	10% +/- 2%
Color	Green
pH	6.5 +/- .4

Application equipment is available.
