

Hydro OPS™ – High Pressure Linear Odor Control

Water Fogging Systems for Odor Control

The LSC HYDRO OPS™ (Odor Pairing System) Deployment Unit generates high pressure odor-control fog using ODOR-ARMOR® products to deliver immediate neutralization of nuisance odors.

This concentrated blend of odor neutralizing compounds is mixed with water and atomized into an ultra-fine mist and delivered into environments where the highest level of odor neutralization is required.

Fog is evenly dispersed through strategically placed nozzles, providing consistent, effective odor control throughout the target area.

Hydro OPS™ – High Pressure Linear Odor Control

Benefits of High-Pressure Fogging Technology

- Water droplets assist in encapsulation
- Odor control you can see
- Large supporting family of products
- Customizable multi-zone systems available
- Economical application rates

Common HYDRO OPS™ Applications:

- Landfills
- Transfer stations
- Wastewater
- Sludge handling
- Exhaust stack fans
- Agri-food processors
- Petrochemical
- Greenhouses

Water Based Fogging Formulations

ODOR-ARMOR® is a highly effective concentrated, multi-component, blend of natural odor neutralizing compounds designed specifically for use in water based HYDRO OPS™ deployment systems. These formulations are mixed with water and pressurized to create fine atomization at each nozzle. When the odor control solution is released, the droplets collide with malodor compounds where a series of scientific reactions occur, neutralizing the nuisance smells.
